

The EU 100 is our lowest cost etch unit. Variable voltage controls are operated manually. Ideal for small batch sizes. Complete with accessories such as electrolyte, marking head, and cable set, this system provides a fast, reliable, and low-cost entry into the electrolytic etching field.

Advantages

- Non-erosive electrolytes
- Non-smearing permanent marking
- No part deformation
- High-quality permanent marks
- Affordable

Specifications

Input Voltage	115V or 230V AC
Output Voltage	0V - 24V (AC / DC)
Power	100VA
Dimensions	155 x 200 x 150 mm
